<p>fastdfs</p> <p>FastDFS is an open source high performance distributed file system (DFS). It's major functions include: file storing, file syncing and file accessing, and design for high capacity and load balance.</p> <p>● C ★ 2.8k 🍴 861</p>	<p>fastdfs-client-java</p> <p>FastDFS java client SDK</p> <p>● Java ★ 419 🍴 350</p>
<p>libfastcommon</p> <p>c common functions library extracted from my open source project FastDFS. this library is very simple and stable. functions including: string, logger, chain, hash, socket, ini file reader, base64 e...</p> <p>● C ★ 331 🍴 229</p>	<p>libshmcache</p> <p>libshmcache is a local cache in the share memory for processes. high performance due to read is lockless. libshmcache is 100+ times faster than a remote inter such as redis.</p> <p>● C ★ 238 🍴 65</p>
<p>fastdfs-nginx-module</p> <p>FastDFS nginx module</p> <p>● C ★ 153 🍴 108</p>	<p>fastdht</p> <p>FastDHT is a high performance distributed hash table which based key value pairs. It can store mass key value such as filename mapping, session data and user related data.</p> <p>● C ★ 67 🍴 41</p>

1 fastdfs : 主程序

<https://github.com/happyfish100/fastdfs/archive/master.zip>

2 libfastcommon : 是从 FastDFS 和 FastDHT 中提取出来的公共 C 函数库, 基础环境, 安装即可。

<https://github.com/happyfish100/libfastcommon/archive/master.zip>

3 fastdfs-nginx-module : 是fastdfs与nginx相结合的安装包

<https://github.com/happyfish100/fastdfs-nginx-module/archive/master.zip>

4 fastdfs-client-java : 是用JAVA语言连接fastdfs的客户端

<https://github.com/happyfish100/fastdfs-client-java/archive/master.zip>

5 libshmcache是基于共享内存的本地缓存库。不需要下载安装

6 fastdht是一个高性能的分布式哈希系统，可以配合fastdfs 进行文件重复的处理。 不需要下载安装。

7 Nginx 安装Nginx作为服务器以支持Http方式访问文件

<http://nginx.org/download/nginx-1.13.12.tar.gz>
