设置下面两个ip可以正常访问，其他ip调整到维护页

```
1   server {
2           listen        80;
3           server_name   www.hp965.com;
4
5           access_log   logs/www.hp965.com.log   main;
6           proxy_set_header X-Forwarded-For $remote_addr;
7           proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
8
9           location / {
10                      if ($remote_addr !~* (111.47.16.194|106.14.123.148)){
11                              rewrite ^(.*)$ http://wh.hp965.com/ break;
12                  }
13
14              proxy_pass    http://www.hp965.com;
15              client_max_body_size    5m;
16          }
17      }
```

维护页配置如下：

```
1   server {
2           listen        80;
3           server_name   wh.hp965.com;
4           location / {
5               root    /usr/local/nginx/html/hp096Maintain;
6           }
7           error_page   500 502 503 504   /50x.html;
8           location = /50x.html {
9               root    html;
10          }
11      }
12
```

正则

```
1  ~  区分大小写匹配
2  ~*  不区分大小写匹配
3  !~和!~*分别为区分大小写不匹配及不区分大小写不匹配
4  ^  匹配的开头
5  $  匹配的结尾
6  .  *  ?等需要转义
7
8
9
```
